

S143 | SOLID COLOURS

Bodaq's range of solid colour interior films offer a versatile, easy-to-install solution for enhancing interior surfaces. With a large variety of colors, it provides a durable, low-maintenance finish ideal for updating spaces and adding a personal touch to your interior design.

DURABILITY

Bodaq Interior Films provide exceptional resilience when it comes to withstanding water, dirt, abrasion, UV radiation, and various types of wear, including issues like yellowing, cracking, scaling, and delamination.

MAINTENANCE

To maintain a perfect appearance and make your refinished surface last longer, it is recommended that you do the following:

1. Bodaq is easy to clean, so do not use harsh abrasive cleaners. If the stain is hard to remove, use ethanol mixed with water 1:1.

2. Do not use regular erasers/scrubbers on the film surface. We recommend using melamine sponges, or a microfiber towel.

3. Do not cut anything with a knife directly on the film.

4. Do not put hot metal objects on the surface wrapped with the film. If the object's temperature is higher than 50 degrees Celsius, it may damage the film.

5. In case of film peeling, please contact your installer to avoid further damage.

NOTE

Hyundai retains the right to modify the composition of Bodaq Interior Films at its discretion. Please be aware that the colours displayed on computer or mobile phone screens may not provide a precise representation of the actual appearance due to screen variations. To ensure an accurate understanding of the colour, we strongly recommend ordering a sample. Additionally, considering slight color variations in production batches, it is advisable to purchase the necessary quantity for your project in a single order to maintain consistent appearance during execution.
